PROJECTS

News App Flutter| Link Oct' 25

- Connected the app with **NewsAPI.org** using the Dio package to fetch and display latest news articles from the internet in real time.
- Added useful features like search and category filters (Technology, Sports, etc.) so that users can quickly find the news they want.
- Used Dart for handling data, converting JSON responses into app models, and structured the project properly using dependency injections to keep the code clean, scalable, and easy to maintain.
- Managed apps state efficiently using the Bloc pattern to keep the UI fast, organized, and responsive.
- **Tech: Flutter, Dart, Bloc pattern, REST APIs**

E-commerce-Complete-Flutter-UI | Link Apr' 25

- Built a clean and modern **e-commerce mobile app UI** using **Flutter**, with multiple screens like Home, Product Details, Cart, and Checkout.
- Improved user experience by adding smooth screen animations and easy touch gestures for better and more interactive navigation.
- Organized the project using reusable components and a proper folder structure, making the code easy to manage, update, and scale in the future.
- Used **GetX** for state management and navigation to handle data efficiently and keep the app fast and responsive.
- **Tech: Flutter, Dart, REST API, GetX**
